

I'm hungry. I wonder what's open right now.

Teresa Jones, an app admin, is hungry and wants food.

I'll use the app to figure out which place to go to eat!

She used her app that she helped engineer to find available food on the campus.

Oh no! there's a lot of people at all of the restaurants on campus, and it's Sunday, so Chick Fil A is closed.

Wait! the honeycomb cafe only has 5 people in it. I'll go there.

She finds that there are a lot of people in all of the places, except the Honeycomb Cafe.

Let me just check the menu before I leave. Nice! they have tacos

Now off I go to honeycomb cafe

Teresa checks the menu of Honeycomb Cafe before leaving her house.

Wow this food is great! I'm glad I used my app to look at the menu and capacity beforehand

She enjoys her food at the Honeycomb Cafe.

Wow that was a great meal. I think I'll use the app next time too.

She considers using the app again to find food.
